26. 540.SGF - sidewalk guy ftg	21	55. PTB, PTA, Pole top brackets	49
27. SB - spool bolt	15	56. LP - Line Post Insulators	50 - 51
28. 2.GH - guy hook (2 per installation)	44		

8-Way Expanding Anchors Black Asphalt Coated

Form a square when expanded. The pointed corner blades make starting easy. The eight blades, one-piece top plate, deeply embossed for additional strength, expand upon impact into undisturbed earth to form a pyramid shaped square. The 8-way anchor retains its shape under extremely heavy loads due to the support of the eight blades by the base plate. These anchors are coated with a special asphalt paint to protect them against corrosive soil.

CROSS-PLATES AND SQUARE

Cross-Plate Anchor Black Asphalt Coated

Cross-Plate anchors are formed from structural steel are ribbed for extra strength and reinforcement. Plate edges are flanged to resist creeping. Plates are welded at right angles for maximum holding ability. Nut retainer is provided to aid installation. These anchors are available with high-grade asphalt coating.

	834ADT	8'	3/4	5	1320

Minimum breaking strength at thread root:

5/8" diameter - 15, 000 lbs.

3/4" diameter - 23, 000 lbs.

All anchor rods supplied with heavy square nuts.

658ADT

Rock Anchors

For solid rock or in stone or concrete walls. Made from 1" round steel, with drop forged eye, flattened at the top.

C.S.A. Standard Drawing No. A-2

Cat.No.	Size	Std.Pkg.	Wt.-lbs./ C
121RAW	1" x 12" c/w wedge	10	450
181RAW	1" x 18" c/w wedge	10	600
30W	Wedge only	10	30

Installation of Rock Anchor:

Drill hole in rock; expand bottom end with wedge by pounding top of anchor with sledge hammer. Grout with cement.

181RAW

30W

Rock Anchor Extension

Hot dip galvanized. Shipped ready to install c/w bolt and nut and double strand eye. Used in conjunction with Rock Anchor, mainly when rock anchor is installed below grade.

Angle Suspension Clamps

Features

Type ACA clamps are recommended for ACSR and all aluminum conductors only. Liners are not required. Not recommended for copper or copperweld conductor. Clamps bodies and keepers are of high strength heat treated aluminum alloy. Hardware is hot dip galvanized steel, humback cotter pin is stainless steel.

Transformer Cluster Mount

For mounting 3 transformers with the following maximum weights:

40TCM up to 3 x 650 lbs.

65TCM up to 3 x 1300 lbs.

100TCM up to 3 x 2250 lbs.

Bolts for mounting transformers included. Lifting eye provided.

TRANSFORMER MOUNTING

Universal Mounting Bracket with Adapter Plates

Universal mounting bracket consists of 3 brackets and one plate bolted together. Bolts and ground- ing clamp included. 3 only 3/4" mounting bolts also included.

Horizontal adapter plate for transformers with 15", 22" or 29" bracket spacing - 5/8" mounting bolts and washers included.

Vertical adapter plate for transformers with 15" mounting bracket- 3/4" mounting bolts and wash- ers included or 11/16" hardware.

Cat. No.	Description	Std. Pkg.	Wt.-lbs./ each
65UMB	Universal mounting bracket (2-phase type)	1	36
95UMB	Universal mounting bracket (3-phase type)	1	45
95UMB-13	3 phase c/w 13/16 Keyhole	1	45
35UMB-13	Single phase c/w 13/16 Keyhole	1	25
35UMB	Universal mounting bracket 1-phase	1	25
14HAP	Horizontal adapter plate	6	7
15VAP	Vertical adapter plate	9	6
15VAP-11	Vertical adapter plate -11/16 hole c/w 3 bolts	9	6

3 methods of installation:

#1: Using 2 sets of 95UMB spaced vertically to fit transformers with 15", 22" or 29" brackets – 3/4" mounting bolts (included in 95UMB package).

#2: Using 1 set of 95UMB with 15VAP vertical adapter plates - 3/4" mounting bolts.

#3: 2 sets of 95UMB with 2 sets of 14HAP horizontal adapter plates- 5/8" mounting bolts- for transformers without direct pole mounting feature.

95UMB (Kit)

15VAP

14HAP

Universal Mounting Bracket with Adapter Plates

Galvanized Steel - Universal mounting bracket consists of 3 brackets and one plate bolted together. Bolts and grounding clamp included.

95UMB

- 1: The height varies depending of the power of the transformer to be installed
- 2: The total weight of the transformer group should NOT exceed 2460kg and the weight of a singler one 700kg
- 3: Mounting support for three single-phase transformers from 25 to 167 kVA, with 3/4" dia. mounting bolts

95UMB - Two Units Shown

Strain Yokes

Used on transmission lines to suspend 2 wires from a suspension insulator. Standard design has 3 holes only. Additional holes can be provided on request.

- Customized yoke plates available upon request.

Pole Mounts - for mounting poles on rock

Each set consists of four, one inch deformed round steel anchor bars, which are bolted to the pole by pole attachment plates. Pole-through bolts are not included and should be ordered separately. The rock is drilled to the required depth using a 1-1/4" drill. The anchor bolts are grouted in each hole with cement or sulphur.

41PRA pole mount sets are for light duty construction and require 5/8" pole-through bolts.

The pole attachment plates are 1/2" x 2- 1/2" steel with 11/16" holes in each plate.

61PRA pole mounts sets are for medium duty construction and require 3/4" pole-through bolts.

The pole attachment plates are 1/2" x 2-1/2" steel with 13/16" holes in each plate.
